**Subject:** Confidential: draft ATSDR Health Consultation (Dimock)

Dana T.:

In the first attachment, you will find in green text our (Janine and my) feedback following a review of a recently received (June 25<sup>th</sup>) revised draft version of the subject. Note that the red text were our comments following review of the May version and the blue text represents our comments/input developed and provided from the review of the earlier version (i.e., a couple of months back).

Ex. 5 - Deliberative

Ex. 5 - Deliberative

At this time, I believe that we have no additional comments to offer.

I understand that ATSDR is looking to share within the next few days their latest draft version with PA Public Health for their review and comments/input.

I'm also attaching here the above mentioned latest draft of the subject report. It is provided in two separate files (one is ATSDR's own compare version and the other one is a their clean version).

Let me know if there are any questions.
